

2x4 Panel Surface Mount Kit

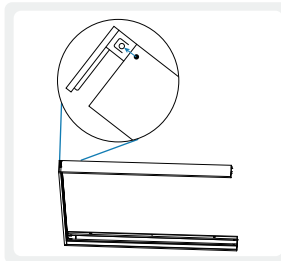

Installation Manual

COMPONENTS

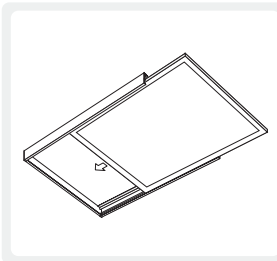

Please review all instructions carefully before proceeding.

SURFACE MOUNT

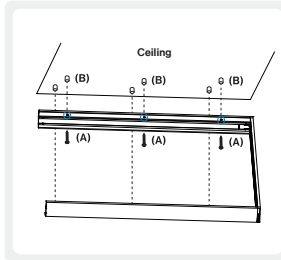

Step 1

- a. Turn off circuit before installation.
- b. Assemble three of the four frame pieces by connecting the respective corners into a U-shape.
- c. Align the hole in the short frame piece with the corresponding plastic tab on the long frame piece.
- d. Secure the frame pieces together ensuring the frames lock into place.

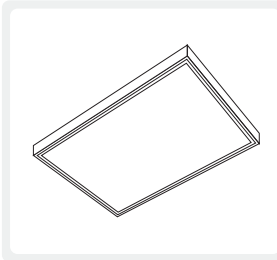

Step 3

- a. Slide panel onto assembled frame.

Step 2

- a. Mark pilot holes on the ceiling using the assembled mounting frame as a reference.
- b. Drill marked pilot holes, then insert the plastic anchors (B).
- c. Then, insert self-tapping screws (A) to secure assembled frame onto ceiling.

Step 4

- a. Make electrical connections for the installed panel.
- b. Secure the final grid frame piece into place.
- c. Turn on circuit breaker and test light.

WARNING

- Turn off circuit breaker before installing fixture.
 - Improper installation, including incorrect wiring or mounting, can lead to malfunction, electrical shorts, or fire hazards. Follow the manufacturer's instructions carefully and use the proper tools for installation.
 - Only use the recommended components and ensure the Surface Mount Kit is compatible with the LED panel. Using incompatible parts may cause overheating, performance issues, or permanent damage to the lighting system.
 - All electrical connections must be in accordance with local and National Electric Code (N.E.C.) standards. • Please review installation manual carefully before proceeding. Consult a qualified electrician if you are unfamiliar with proper electrical wiring connections.
 - Operation is subject to the following two conditions: 1) This device may not cause harmful interference. 2) This device must accept any interference that may cause undesired operation.
